25X1

Dear [Redacted]

25X1

The Department of Energy supports the proposed new conference facility. The plan appears excellent and well thought out. We estimate using the new facility at least three to four times a year for both training and meetings. We have no facility that should be considered as an alternate to the proposal. The Department of Energy can make available its assessment of \$20,000 in FY 1984 money. We feel that the best approach to the annual operating expenses would be user fees on a per-day-of-use basis.

Sincerely,

Charles V. Boykin
Charles V. Boykin
